

The new mobile website from Michael Saunders & Company puts detailed property information in the palm of your hands almost as quickly as you can request it. Anytime. Any place. **Simply go to your smartphone's web browser and type in [michaelsaunders.com](http://michaelsaunders.com) and start searching!**

- MS&C's new mobile website is your on-the-go version of Southwest's Florida's most depended-on web site for detailed, up-to-date property information.
- With graphics specifically designed for the small screen, you'll enjoy a much more satisfying viewing experience on your web-enabled phone.
- The site offers a more complete search experience by allowing you access to all property listings—both active AND pending—in our market areas, provided they are listed on the MLS. Other companies offer you access to their listings only.
- It gives you the advantage of examining property details while your interest in the property is top-of-mind. If desired, you can “save” the results to compare with other properties later on with a secure, password protected login.
- All content delivered is strictly relevant to your specific query. There are no display or pop-up ads to distract or annoy.
- If your web-enabled phone is also GPS enabled, you can search for other properties in the immediate vicinity of where you're dialing-in from.
- You can also browse for weekend open houses in areas of interest; then locate other open houses nearby.

**No special downloads or purchasing an app! Just go to ANY smartphone web browser and go to [michaelsaunders.com](http://michaelsaunders.com)**
